Mismatched training and dev/test data

Addressing data mismatch

Addressing data mismatch

- • Carry out manual error analysis to try to understand difference between training and dev/test sets

E.g. noisy - car noise

street numbers

- • Make training data more similar; or collect more data similar to dev/test sets

E.g. Simulate noisy in-car data

Artificial data synthesis

+

=

“The quick brown
fox jumps
over the lazy dog.”

↑
10,000 hours

Car noise

Overfit to 1 hour of
car noise
↓
10,000 hours
