Single number
evaluation
metric

Using a single number evaluation metric

→ Of examples recognized as cat,
what % actually are cats?
→ what % of actual cats
are correctly recognized

Classifier	Precision	Recall
A	95%	90%
B	98%	85%

F₁ score = "Average" of P and R.

$$\left(\frac{2}{\frac{1}{P} + \frac{1}{R}} \right) \text{ "Harmonic mean"}$$
